

Vfence™

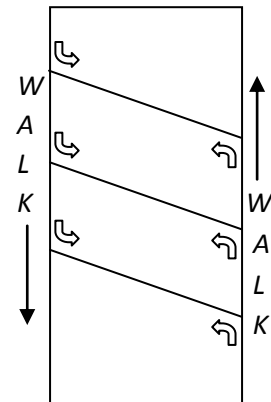

THE Humane Migration Fence System™

SET-UP GUIDELINES AND TIPS

- 1) Place the one and only component on floor against wall where you want fence to be located.
- 2) Place a second piece on same line, overlapping first piece approximately 4-6”.
- 3) Continue until you reach the other wall.
- 4) Repeat as needed.

BENEFITS

- Only One Component.
 - No stand assemblies needed for stability.
 - No connector rings to drop and lose in litter.
 - No separate piece required for feed or water lines.
 - *Just cut out 1-3 wires as needed.*
- No need to anchor to wall.
- No assembly required or “snapping” together.
- No concerns about tension of fence.
- No big deal - just put it down and walk away!!

Set Up Tip*

***TIP**

Place Vfence™ at slight angle in the house (see diagram), then walk house down one side and back the other, so birds will flow with the open angle and not be trapped in a corner.

When it's time to remove Vfence™ during change overs, read above guidelines backwards; and hang on wall until needed again.
